Examiner's signature, if required

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicants' Representative proposes to amendment claim 1 to include a critical feature of the invention wherein the main scanning beam, which comprises a plurality of sub-beams, comprises an unmodulated energy as a whole having a Gaussian profile. This feature is not taught by the reference in Yoshida, which teaches each of the sub-beams has a separate Gaussian profile. Applicants' Representative will also cancel claim 10 in view of the amendment of claim 1.
